ISIN EUR Hedged (B1): LU1913290406

RETAIL CLASS: Min. 1,000

Mgmt Fee: 1.50%  
Performance Fee: -  
ISIN USD (A2): LU1913290315  
ISIN EUR Hedged (B2): LU1913290588

### Key Benefits

- The portfolio participates in equity bull markets by actively managing the equity weight in the portfolio, shifting it in steps of 10-30% with a maximum allocation to equities of 60%
- Addresses investor risk aversion by using an equity “underweight” that is larger than the corresponding equity “overweight”
- Changes to a zero allocation to equities when the outlook deteriorates, like in 2008, 2010, 2011 and late 2015
- Relies on a systematic investment process supported by algorithms built on behavioral finance and machine learning

Systematically managing risk and performance via asset allocation changes in a portfolio from 0% to 60% equities

### Investment Strategy

ACCI Dynamic – Diversified Market Portfolio (DMP) is a medium risk multi-asset class strategy focused on providing an attractive return on invested capital via a long-term total return strategy seeking to limit volatility and drawdowns. The strategy's aim is to always hold a portfolio, which is appropriate for the financial outlook, even if this entails having a zero allocation to equities. To secure objectivity, reliability and speed in the decision-making process we supplement our qualitative analysis with behavioral finance-driven decision support algorithms.

### Asset Allocation

ACCI DMP allows risk averse investors to benefit from globally diversified portfolio participating in upwards trending equity markets. The strategy achieves this by actively managing the allocation and equity exposure of the portfolio, while never holding more than 60% in equities and going completely out of the equity market when the outlook deteriorates significantly. The total portfolios are fully invested in ETFs.

Current Portfolio:
