Key Benefits

- ➤ Designed to outperform its benchmarks and global equities by systematically managing the risk and equity holdings in the portfolio across the business cycle
- ➤ Shifts its assets using the whole combination within the asset spectrum from equities to cash, just used when the outlook deteriorates
- Uses algorithms based on behavioral finance to secure consistency, objectivity, and speed in making allocation decisions
- Can be tailored to individual client and business needs
- We aim to outperformed MSCI World equity markets on a full economic cycle, 5-7 years horizon, while reducing drawdown

ACCI Dynamic - Systematic Allocation (SA)

The way to have Global Equity in different economic cycles. Up to 100% Global Equity Exposure.

Investment Strategy

ACCI Dynamic - SA is a systematically managed multi asset portfolio dynamically shifting its equity allocation from up to 100%. The Fund aims to provide an attractive long-term return from two sources systematic asset allocation and an efficient underlying asset selection. The fund seeks to outperform a balanced benchmark of 50% equities and 50% bonds on a 3-year horizon and also the MSCI World over a full market cycle 5-7 years. By systematically reducing equity weight when the outlook for financial markets deteriorates, we seek to limit drawdowns and human biases and thereby have higher starting points for building asset values when equity markets resume their upwards trend.

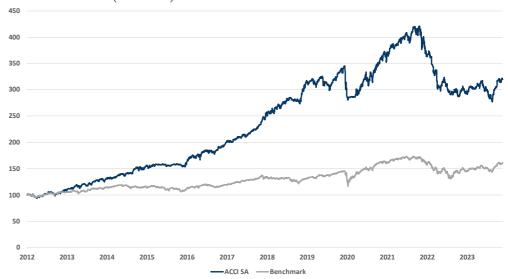

Asset Allocation

ACCI Dynamic – SA will be holding close to 100% in equities most of the time. However, when the market outlook deteriorates, this equity allocation will be reduced according to market conditions. In cases of a very negative outlook the equity exposure will decrease accordingly. When Equities are reduced, the balance of the portfolio is invested in fixed income instruments or cash. The total portfolios are fully invested in ETFs.

Performance (in USD)

*Performance based on simulation from 2012 to 2018. Return for 2019 reflects only the performance since inception (March 25th, 2019). Composite Index: 50% ICE BofA Global Broad Market + 50% MSCI ACWI.

Disclaimer

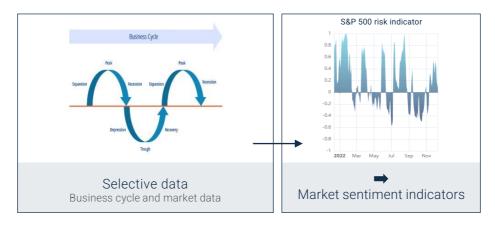

Past performance does not guarantee future performance. This document is for information only, consult other documentation of the fund in our website or e-mail addres. The Fund is a privately offered security and therefore not registered with the BCU

ACCI Dynamic - Systematic Allocation (SA)

The way to have Global Equity in different economic cycles. Up to 100% Global Equity Exposure.

Value creation through a market sentiment indicator

The Dynamic strategy seeks a long term total return aiming to create an annual return of 6%-10% across the business cycle and to outperform MSCI World equity index (gross) across different market conditions. The equity allocation will be changing dynamically between 0% and 100%.
