*4% p.a. paid semiannually in March and September

Key Benefits

- Globally diversified exposure to the full credit spectrum of emerging- and developed market bonds
- Diversification across duration in investment grade and sub-investment grade asset classes
- Continuous review and adjustments of asset class weights to match central bank policy outlook
- Systematic management of both duration exposure and credit risk exposure, via significant alpha-creating allocation shifts between sub-asset classes
- Solid total return from the core diversified portfolio and additional performance from the systematic allocation process

ACCI Dynamic - Global Fixed Income Opportunities (GFO)

A global fixed income portfolio created with the aim to generate performance while managing risk in any market environment. Fully invested in global fixed income.

Investment Strategy

Volatility in Fixed Income has increased and need for diversification is required. To address current backdrop, we propose ACCI – Dynamic Global Fixed Income Opportunities portfolio (GFO). These portfolios provide fixed income investors with diversification across credit quality, geographical regions and duration. To perform and limit volatility and drawdowns, we propose solutions for systematic and dynamic management of credit risk and duration in response to changes to the financial outlook.

Asset Allocation

We propose to actively manage the portfolio's risk level, by moving the portfolio allocation from safe and stable bonds to more risky credit, in line with the changing outlook of financial markets. The portfolio will tilt its risk level based on a systematic signal and will be built by experienced fund managers with the aim to generate alpha in different market conditions. The total portfolios are fully invested in ETFs.
